IPCAM-WI Cameras

Video Alert

Total Connect App

Total Connect with video...putting the focus on opportunity.

Total Connect Video Service let your customers effortlessly look in on their homes and businesses on PCs, laptops and the same mobile devices they use each and every day. They can view live, streaming video, take snapshots or have video alerts and pictures e-mailed to them upon important events like a child coming home from school or a delivery arriving—all via secure, easy-to-install IP cameras.

When using the new Total Connect App, your customers can even turn every Apple® iPhone®, iPad™ and iPod touch® into a wireless keypad and portable video viewer. With the tap of a finger, they can toggle between security and video functions and view up to six cameras at a time. It's a great way to help increase your RMR, reduce attrition and create a more loyal customer base. Just picture what it can do for your business!
